

Wattmon Hardware

There are currently three variations of the Wattmon device: WattmonMEGA, WattmonPRO, and WattmonMINI.

- The Wattmon original hardware is no longer in circulation.¹⁾
- The [WattmonPRO](#) is the most flexible device with multiple interfaces and built in IO ports.
- The [WattmonMINI](#) is a reduced version of the WattmonPRO with a single Modbus RTU port.
- The [WattmonMEGA](#) has 512kb RAM and 100Mbit Ethernet. It operates at 200MHz making it over twice as fast as the PRO.

¹⁾

Most but not all of the reference information documented here applies to the original Wattmon.
