

ieee754toint

WMPRO, WMMINI FW >= 1.897 WMMEGA FW >= 2.0

Convert a **float value** to an IEEE-754 encoded **integer** (32 bit)

Description

```
int ieee754toint (float $value )
```

Return the IEEE-754 encoded **integer** representation of a **float value**

Parameter

\$value: Float to convert to an IEEE-754 encoded **integer**

Return Values

IEEE-754 encoded **integer**
