

# Accessories

This page contains a comprehensive list of the 3rd Party modules, sensors, devices and accessories that we have sourced from other manufacturers, sold, customized or recommended for the [Wattmons](#). It will contain links to documentation for each of them.

The WattmonOS contains drivers for all of these devices, many of them with automatic detection and configuration. The currently available devices are at the top of the list. Below those, the discontinued or obsolete items are listed, for the purpose of providing documentation for those that own them and are yet using them, and as a demonstration of the many potential applications for the [Wattmon](#).<sup>1)</sup>

## Coming soon!

We're working on it now, check back soon, as the information you need might be here then!

ACCESSORY	DESCRIPTION	MANUFACTURER	STATUS

	Custom Waterproof Decal Stickers and Warning Signs	Wattmon	Inquire

Perhaps you don't see your device in this list? It might be one of the many RS-485 Modbus RTU devices we manufacturer that are listed in [Modules](#).

<sup>1)</sup>

Some of the devices are no longer stocked because they were replaced with a better device. Others have been dropped for other reasons, sometimes lack of orders. Please contact us if your application could benefit from the use of any of the discontinued items: we will consider sourcing more of them again to fill a special order if there is enough potential demand.
