

is_array

WMPRO, WMMINI FW >= 1.0 WMMEGA FW >= 2.0

Return 1 if the variable is an array

Description

`int is_array ( mixed $variable )`

Check if a variable or value is an array

Parameters

variable: Variable or expression to be evaluated

Return Value

1 (true) if array, 0 (false) if not an array

Examples

```
<?
$x=1;
print(is_array($x)); //outputs 0
$y=array("one");
print(is_array($y)); //outputs 1
?>
```

Notes

This function checks ONLY the type of the variable, not the data that it holds!
