

# is\_array

WMPRO, WMMINI FW >= 1.0 WMMEGA FW >= 2.0

Check if a variable is an **array**

## Description

`int is_array ( mixed $variable )`

Check if a variable or value is an **array**

## Parameter

**\$variable**: Variable or expression to be evaluated

## Return Value

1 (true) if **array**, 0 (false) if not an array

## Examples

```
<?
 $x=1;
 print(is_array($x)); // outputs 0
 $y=array("one");
 print(is_array($y)); // outputs 1
?>
```

## Notes

This function checks ONLY the type of the variable, not the data that it holds!
