max_execution_time

WMPRO, WMMINI FW >= 1.0 WMMEGA FW >= 2.0

Set the maximum execution time for the script

Description

max_execution_time (int $seconds)

This function changes the maximum execution time for the current script. If a script continues to execute for longer than this time it is terminated. The default value is not affected by this function, it is configured in *Control Panel > uPHP Script Setup (uPHP Settings)* and is stored in `/config/uphp.ini`.

Parameter

$seconds: Maximum execution time

Return Value

None

Example

```
<?
  max_execution_time(600); // allow the script to run for up to ten minutes
?>
```

See Also

microtime() - Return number of milliseconds since boot

time() - Return current system timestamp

uptime() - Return uptime in milliseconds
