remove_cron

WattmonOS 3.12+

Remove a script from the CRON scheduler

Library

```
/lib/uphp/system.inc
```

Description

remove_cron (string $filename)

This will attempt to remove the script from the scheduler. This will effectively recreate the crontab file and changes will only be applied after a reboot.

Parameters

$filename: Full path to filename to be executed

Return Values

int - 1 if the script was found and removed, 0 if the script was not found in the crontab
